

Hybrid Power Module

HPM-30

 SINGLE WIRE
COMMUNICATION

 HYBRID

 WINDOWS
PROGRAMMING

Introducing Renau's all-new Single Wire Communication Network- Compatible HPM-30 Hybrid Power Module. With our custom-tailored controller, anything you can imagine, we can control. Specifically designed for the foodservice industry, Renau's HPM-30 combines with any of our interface devices to easily adapt to any situation your kitchen equipment, refrigeration, or foodservice application requires.

With a compact, durable design, the HPM-30 replaces conventional multi-part relays with a single microprocessor-based module that significantly increases reliability and product life while reducing the end-user's labor, maintenance, and inventory costs.

Using Renau's Single Wire Communication Network, the HPM-30 connects to any of Renau's compact, intuitive user-interface displays and HMC Series Hybrid Micro Controllers to power even the most intensive and demanding applications. Operators and customers see a sleek, elegant display that can be mounted

anywhere on the appliance, from door panels and edges to frames and more, eliminating expensive, complicated harnesses while keeping the HPM-30 out of sight within the controlled equipment.

Energy efficiency comes from the unique design and custom programming of the HPM-30. Despite its small size, built-in fault detection quickly and clearly identifies the cause of the error, cutting down on both valuable troubleshooting time and food waste. If a possible problem is detected, fully-customizable warning lights on the display interface alert operators to any errors or potential problems

Designed with the foodservice industry's harsh environments specifically in mind, the HPM-30 is fully encapsulated for outstanding protection from extreme temperatures, humidity, and shock. Designed and manufactured in the USA, all Renau products are rigorously tested and come with an extended three year warranty.

Dimensions:

- 2.15"W x 1.75"H x 3.2"D

Features:

- 2 x 30A Hybrid Relay Outputs
- Operating Temperature: 0-80°C (32-176°F)

Warranty:

- Every Renau product is thoroughly tested at numerous stages of production and comes with an extended three (3) year warranty.

Benefits:

- Durable and reliable
- Simple, inexpensive installation
- Eliminates expensive, complicated wiring harnesses
- Compatible with any Renau Single Wire Communication interface
- Fully-encapsulated for maximum protection in harsh environments
- Low power consumption
- Easily upgradeable and scaleable

Wide range of applications:

- Ideal for commercial foodservice equipment such as ovens, food warming/holding cabinets, fryers, refrigeration equipment, steamers, industrial machines, and more.

We do more than design. We invent.
